Fifth grade science students have been working on their studies of ecosystems. We have studied how plants get and use energy as well as how organisms interact in ecosystems. Students have had the opportunity to work with food chains and food webs. We also had the experience of simulating a predator prey relationship. We will next move on to examining how ecosystems change. Students should expect a quiz on Monday of next week.

Dear families Assalamu-alaikum,

During the past couple of weeks, we continued in the unit of Salah our learning about the requirements for an accepted prayer. We discussed, in details, each of the 5 requirements and learned about their significance, reward, and how to do them right. In addition, the students took the first quiz of the quarter.

Have a nice weekend and if you have any questions or concerns please don't hesitate to contact me at khatib@school.lansingislam.com
